### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Kathleen Frost (Reg. No. 37,326) on Monday, January 23, 2006.

The application has been amended as follows:

Claim 23 is amended such that the period, ".", at the end of line 14 is replaced by the phrase --wherein in the applying step the suction at least partially collapses the vessel.--

Claim 24 is rewritten as --The method of claim 23, wherein in the applying step the suction draws the interior wall into contact with the electrode array.--

***Information Disclosure Statement***

The examiner has considered the references included in the IDS filed 10/31/2005 and they do change the allowability of the previously presented independent claim. Particularly, the step of suctioning moisture from the treatment site is disclosed.

***Reasons for Allowance***

The following is an examiner's statement of reasons for allowance:

The prior art does not individually or collectively disclose, imply, suggest and/or teach the method of providing two spaced apart balloons on a catheter, wherein an electrode array is located on the catheter between the balloons and applying suction in the region between the inflated balloon members to remove moisture released during ablation, said suction substantially preventing formulation of a low-impedance liquid layer around the electrodes when ablation is carried out using the electrodes and further wherein the suctioning at least partially collapses the vessel wall between the two spaced apart balloons.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
